Minibeasts Project Ideas

Over the next couple of weeks we are looking at ‘Minibeasts’ in school.

During the week commencing 27th April, we will be carrying out a minibeast hunt and writing down a list of what we find. We will be having a ‘minibeast tea party’, with the task of sharing out celery pieces and making sure every minibeast has the same amount. Our week will finish with drawing a picture and writing a description of our favourite minibeast. You may like to join in with these things at home and I wonder if you could make a healthy minibeast snack to eat and send us the pictures of your designs!

During the week commencing 4th May, we will continue looking at minibeasts with a focus on pond life! We will be doubling spots on ladybird wings to explore the concept of doubling numbers. I wonder if you can find out what double 10 is? We have a couple of worksheets on our website for you to try it out! Our writing focus this week will be on the ‘Lifecycle of a Frog’, talking about the changes we see from frogspawn to tadpole to froglet to frog,
before the cycle repeats itself again! We will finish our week thinking about moving around like frogs, jumping, hopping and then sitting still! Maybe you could chalk the lifecycle of a frog picture in your gardens? Or write about it on the worksheet on our website?
